Wa have to acknowledge receipt of "The Chronicle and Directory for China, Japan, the Philippines, &c., for the year 1880," issued from the Daily Press Office. It is a handsomely-got-up book, and will doubtless fully maintain its reputation for usefulness in all the ports to which its information applies.

WE have received a copy of "An Index to Dr. Williams' 'Syllabic Dictionary of the Chinese Language," by Mr James Acheson, I. M. Customs, Canton. The book, which is clearly printed, is intended as an aid to Students of Chinese in using Williams' large work, and, from the painstaking carefulness shown by the modest young author, we should think that this laudable object has been attained. Mr. Acheson, in his Preface, says -" Every care has been taken to make the references as correct as possible. Very little pretension is made to scientific accuracy in other respects, and short comings may be discovered, but it is yet anticipated that the book will attain its principal object and assist students of Chinese in meeting a widely-acknowledged difficulty."

292 2,517 Totals Grand total, 2,842. A HANDY book for those connected with or interested in Parliamentary Government has just been published. In Crown Colonies where those who have had a training and an experience in "the House" are governors, the rule is, and it is an admirable one, accordance with Parliamentary Procedure. But there are cases in which this cannot

be done. The circumstances are different. The fact of a Colonial Governor not being an independent sovereign, but an official under orders, necessarily gives rise, as is very properly pointed out to some novelties in working the system of responsible government in the colonies; and a sufficient number of difficult cases have already arisen to justify their being grouped together and studied. Mr Todd. the Author of "Parliamentary Government in England," has in the press, a companion work, which is the handy volume we have referred to, -- "Parliamentary Government in the Colonies." The volume, which will contain five hundred pages, will give historical narrations of the origin and working of colonial Governments on the constitutional model, as well as a discussion of the principles involved in the relations of Cabinets to Governors, and of Governors to Secretaries of State. These principles have necessarily been brought into prominence in from these countries, are from to-day dealing with the cases that have arisen, and the way that these cases have been dealt with has established a body of caselaw, which, so far as it is accepted as authoritative, will be a guide for the future. We are somewhat surprised to hear that notwithstanding the living interest of the subject on which the volume treats, and the reputation of the author, the London publisher will not take the risk of issuing the work, in consequence of the general dulness of the times. The Canadian Governent has come to the rescue, and ordered four hundred copies. If there should be any necessity for any further assistance of the same kind from other colonial Governments, we doubt not that it will be readily (Per E. E. A. & O. Telegraph Co.'s Line.) rendered. Hongkong might, as readily as more important colonies, invest in a few

> WE observe in the London Engineering that a large increase is to be made to the Glen fleet of Ocean Steam Ships, as contracts have been given out for the construction of three or four vessels of great size and speed. The vessels will be larger and swifter than the Giencoe, which is at present the finest cargo steam-ship affoat.

The same paper gives details of an extraordinary number of new contracts for immense vessels whose sizes range from 4,000 tons to 7,500 tons, and from 400 feet length to 535 feet length. All these new vessels will be built in Glasgow, and in every case the hulls and boilers are to be of Siemen's Martin steel of special quality, We see by the hopeful signs that trade, though it is changing its conditions, is yet reviving. The other British and Scotch ship-building yards have also a share of new contracts, and from works that have been idle and deserted for eighteen months

and contracted for, is the Cunard packet Sahara, whose dimensions are 500 feet long. 50 feet beam, 41 feet depth, 5 decks, a double bottom, with bollers which like the hull will be of steel, and engines to work with a power of 10,000 horses according to Walt's formula. The coal consumption alone, at the economical rate of 12 pound per hour for each horse power judicated, will amount to near 200 tons per day of 24 returning to her mother or her mistress. hours. A We bear that in some of the new vessels the engine frame will not be made of cast iron, but that the machinery will be carried on strong wrought iron girders, as is the case in the more recent additions of iron clade of H. B. M. navy.-Japan Gavette.

THE Pacific Coast members of Congress findivery little ground for encouragement in the President's statement concerning the negotiations with the Chinese Government in regard to the subject of restricting Mongolian immigration. They remark that this portion of the Message is so extremely general and diplomatic in its form of expression that, although it may mean something practical, it may also mean practically nothing. They intend, therefore, to seek for a clear interpretation from its author, and if it be not satisfactory, to mature their vians for legislative action accordingly. The California Representatives do not intend to introduce any considerable number of new measures immediately, but will take an early opportunity to consult with each other and with the Pacific Coast Senators as to the best means of attaining, by harmonious and concurrent action, the objects in which all have a common interest. The principal subject for determination is, of course, the question as to what will be the people of California, and the increased enlightenment of Eastern public opinion upon the subject, success may be attained during the present session, and all announce that no individual exertions shall be spared to accomplish the desired result. Representative Page intends, as a preliminary step, to offer a resolution requesting the President to inform the House of Representatives what, if anything, has been done in regard to amending the Burlingame Treaty, in the manner suggested by a concurrent resolupose of the question by negotiation .- Alta California.

COMMERCIAL.

The market for Bengal Opium has been characterised with some activity during the past fortnight. The rates for both descriptions have advanced, and the native dealers have operated with much confidence in New Patna particularly, perhaps to lay in stocks in the interior, as the New Year is approaching; whilst the favorable accounts from the Coast ports regarding New Benares have made the holders of the drug firmer. The present quotations are \$5721 to \$575 for New Patna, and \$5471 to \$550 for New

The receipts for the month, so far, aggregate 3,900 chests against 4,324 chests at the corresponding period last year. During the interval some 1,000 chests have been taken by the local consumers, against 1,200 chests at the corresponding interval last year. This, with the exportations, leaves the available supply computed at 2,200 chests, against 3,600 chests at the same period last year. Of this last quantity, 500 chests were Benares, of which kind the present stock comprises 1,000 chests.

MR R. STELL'S Freight Circular for the Mail

Since the issue of last Report, business in the Freight market has been on a smaller scale. Domand seems to have slackened somewhat for tonnage homewards, while coast freights have shown more animation, but transactions have been much restricted by the scarcity of vessels.

Homewards, the settlements reported below were effected early in the fortnight; lately there has been less inquiry both from this and from the Philippines, and freights

are consequently weaker. Constwise, the opening of the Tientsin market has given employment to only one vessel as yet, but there exists a fair demand for sultable tonnage, and rates offering show a decided improvement on last year's opening quotations. For Salgon to this, ready steamers are wanted, and rates, on account of the prevailing scarcity of available tonnage, have advanced, but there has been little inquiry for either steamers or sailing vessels from Bangkok, and rates are almost
